

Fast Production Lead-time

Equipped with in-house automated production lines and mature manufacturing management system, we are capable of controlling the whole production cycle.

- Quick sample turnaround for custom tool cart & cabinet projects
- Flexible production scheduling to accommodate urgent bulk orders
- Streamlined workflow reduces waiting time without sacrificing quality
- Full-process QC inspection prevents rework and delivery delays
- Stable production capacity supports repeated large-volume orders

Send us your order quantity and custom requirements, and we will offer you an accurate production schedule.

Flexible Shipping Terms

To accommodate different customers' logistics habits and global delivery demands, we offer a full range of international trade terms.

- EXW: Goods available for pickup directly at our factory
- FOB: We handle customs export and delivery to the designated port
- CIF: We cover product cost, ocean freight and maritime insurance to destination port
- DDP: Door-to-door service, including customs clearance, duties and taxes to your address

Our team will coordinate the whole shipping process. Just tell us your preferred trade term and destination, and we will provide a complete logistics solution.
